

KAVIYA B

Full Stack Developer

📞 91 6374295361 ✉ wmkavyababu@gmail.com 📍 Chennai, India [LinkedIn](#) [GitHub](#) [GeeksforGeeks](#) [HackerRank](#)

OBJECTIVE

Motivated and analytical Full Stack Developer with expertise in C++, OOPs, DBMS, React.js, HTML, CSS, and JavaScript. Gained hands-on experience through hackathons and diverse projects, demonstrating the ability to design and build scalable, customer-centric applications. Passionate about driving efficiency and enhancing user experiences from intelligent health diagnostics to secure banking systems while applying problem-solving skills to create innovative, impactful solutions.

TECHNICAL SKILLS

Languages

C, C++, Java, Python, JavaScript

Frontend

HTML, CSS, ES6+, React.js

Backend

Node.js, REST API, API Integration, AWS

Databases

PostgreSQL, Supabase

Libraries

Pandas, NumPy, Matplotlib, Deep Learning Basics

Core CS

OOPs, DSA, DBMS, Operating System

Tools

Git, GitHub, VS Code, CMake, Figma, Canva

ACHIEVEMENTS

- Winner of Budding Bright Engineer Award
- Winner of Paper Presentation conducted by ACE, SVCE
- Top 5 & Team Leader — Internal Smart India Hackathon conducted by SVCE. Led team to build JalGarbha, a smart rainwater harvesting ecosystem.

EDUCATION

B.E. Computer Science Engineering

Sri Venkateswara College of Engineering (SVCE)

CGPA: 8.78 | 2024 – 2028 | Sriperumbudur, TamilNadu

HDCA – Honours Diploma in Computer Application

Comprehensive 1-Year IT Course | 2024 – 2025 |
C, C++, Java, Python, MS Office, Web Design

PROJECTS

Maternal Health Monitoring System

EfficientNet · XGBoost · PPG Technology · Supabase · Python

- Multi-parameter diagnostic tool for post-pregnant mothers detecting jaundice, anaemia, cardiovascular issues, and depression available in bilingual language.
- Extended to cover pregnancy and child health tracking; research paper publication currently in progress.

JalGarbha: Smart RWH Ecosystem

React.js · TypeScript · CNN · XGBoost · API

- Translated geospatial data into automated feasibility reports for rainwater harvesting — selected for Internal SIH 2025 at SVCE.
- Designed a single-window digital approval workflow replacing manual multi-document water management procedures.

PRAVEEN BANK – Secure Web Banking App

C++ · Crow Framework · JavaScript · HTML/CSS · CMake

- Full-featured banking app with user authentication, account management, deposits, withdrawals, loans, and admin dashboard.
- Secured with token-based REST APIs and efficient file-based (.dat) data storage.
